Kyoto University WISE program
(Doctoral Program for World-leading Innovation & Smart Education)

Application Guidelines for the “Graduate Program for Medical Innovation” for Academic Year 2020

Overview of the program

In order for medical and healthcare innovation in Japan to be accelerated and disseminated worldwide, a system for training excellent personnel who take charge of cutting-edge research and development, and its applications, needs to be established strategically. Based on this idea, the Graduate Program for Medical Innovation aims to train both MD (medical doctor) students and non-MD students to be medical innovators with a global mindset. This will be achieved through collaboration between accomplished medical, pharmaceutical, and health science researchers at Kyoto University.

Kyoto University has been pursuing the world’s highest level of research and has produced internationally-recognized researchers including Nobel laureates. Curriculums that take advantage of this research-based strength of the university have been established by Graduate School of Medicine, Graduate School of Pharmaceutical Sciences, Center for iPS Cell Research and Application(CiRA), and Institute for the Advanced Study of Human Biology(ASHBi), operating under the World Premier International Research Initiative (WPI).

This program is a 5-year doctoral program. For students who fulfill the requirements for completion of the program in addition to attending and completing the curriculum in their departments, the statement, “completed Graduate Program for Medical Innovation,” will be added to the degree certificate.

Further information is available at <https://www.mip.med.kyoto-u.ac.jp>.

1. Eligibility Requirement for applicants

Students who meet both of the following criteria:

- (1) Students who enter the Master’s course or the 4-year Doctoral course in any of the following departments in April 2020;

Graduate School of Medicine: Medicine, Medical Science, Human Health Sciences

Graduate School of Pharmaceutical Sciences: Pharmaceutical Sciences, Biomedical Sciences, Bioinformatics and Chemical Genomics
